DEEPANSHU DHINGRA

Frontend Developer | React.js • Next.js • TypeScript • GSAP • Tailwind CSS • REST APIs

2+ Years Experience | BCA | Responsive Web Applications, UI Animations & Component Design

PROFESSIONAL SUMMARY

Frontend Developer with **2+ years of experience** building responsive, user-friendly web applications using **React.js, Next.js, TypeScript, JavaScript (ES6+), and Tailwind CSS**. Proficient in crafting engaging user interfaces with smooth animations using **GSAP (GreenSock) and CSS**, implementing state management with **Redux Toolkit and TanStack Query**, and integrating **REST and GraphQL APIs**. Experienced in translating Figma designs into clean, semantic, and accessible code across fintech, hospitality, and SaaS platforms. Dedicated to writing modular, reusable components, improving web performance, and collaborating effectively in Agile teams.

CORE SKILLS

- **Frontend & UI Frameworks:** React.js, Next.js (App Router / Pages), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI (MUI), SASS/SCSS, Responsive Web Design
- **Animation & Interactivity:** GSAP (GreenSock Animation Platform), ScrollTrigger, CSS3 Transitions & Keyframes, SVG Animations, UI Micro-interactions
- **State Management & Forms:** Redux Toolkit, TanStack Query (React Query), Context API, Formik, React Hook Form, Zod Schema Validation
- **APIs & Data Integration:** REST APIs (Fetch / Axios), GraphQL, WebSockets, JSON Data Handling, Asynchronous Data Pipelines
- **Tools & Development Workflow:** Git, GitHub, Bitbucket, Postman, Chrome DevTools, Vite, Webpack, Vercel, Figma (UI Translation), Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer

2+ Years Total Experience

Developed and maintained modern, responsive frontend web applications across fintech, hospitality, and SaaS domains. Focused on building reusable UI component libraries with React.js, Next.js, and TypeScript, implementing interactive animations with GSAP, managing application state, and connecting frontend views with backend REST/GraphQL APIs. Collaborated closely with UI/UX designers and backend developers in Agile sprints to deliver clean, fast, and cross-browser compatible user experiences.

PROJECTS & TECHNICAL ENGAGEMENTS

NuGen Atria — *Frontend Developer*

nugenatria.com

Cloud-based hospitality operating system enabling hotels to manage online bookings, front-desk check-ins, room inventories, and in-stay guest service requests.

- Developed responsive admin dashboard interfaces in **React.js, Next.js, and TypeScript**, allowing hotel staff to manage property profiles, room inventories, and daily bookings.
- Built interactive front-desk check-in and checkout workflows with dynamic room grids, date selection, and clear booking status indicators.
- Integrated real-time **WebSocket feeds** to update front-desk staff on incoming guest reservations, housekeeping room cleaning updates, and dining service requests.
- Designed reusable, accessible form controls and modal workflows using **Tailwind CSS** for managing guest profiles, stay histories, and billing records.
- Implemented responsive navigation and smooth layout transitions to ensure seamless usability across tablet and desktop front-desk terminals.

Tech Stack: *Next.js, React.js, TypeScript, Tailwind CSS, WebSockets, Redux Toolkit, REST APIs, HTML5/CSS3*

Arrive Hotels — *Frontend Developer* arrivehotels.com

Content-driven luxury hospitality web platform built with Next.js delivering responsive room discovery, multi-step booking funnels, and localized guest experiences.

- Built responsive, mobile-first web pages in **Next.js and React.js**, consuming **GraphQL and REST APIs** to display real-time room availability and seasonal rates.
- Implemented engaging scroll and entry animations using **GSAP (GreenSock)** for room showcases, amenity cards, and photo galleries.
- Engineered a clean multi-step booking flow featuring interactive date pickers, room selection filters, and guest information forms.
- Optimized page loading times and Core Web Vitals through Next.js static generation, lazy loading, and WebP image optimization.
- Created reusable UI components styled with **Tailwind CSS**, ensuring pixel-perfect alignment with Figma design mockups.

Tech Stack: *Next.js, React.js, TypeScript, GSAP, Tailwind CSS, GraphQL API, Headless CMS (DatoCMS), REST APIs*

CapGro Finex — *Frontend Developer* capgrofinex.com

Regulated financial distribution web platform enabling users to compare loan offers (Home, LAP, Business, MSME), mutual funds, and insurance with transparent APR metrics.

- Developed an interactive, slider-driven **EMI calculator** in **React.js and TypeScript**, computing monthly EMIs and rendering dynamic visual breakups for principal vs. interest in real time.
- Implemented fluid page animations, scroll-triggered section reveals, and metric counters using **GSAP and ScrollTrigger** to enhance user engagement.
- Built multi-step loan comparison and free credit score inquiry forms with OTP verification, masked input fields, and validation using **Formik and Zod**.
- Styled responsive, modern UI components with **Tailwind CSS**, featuring clean typography, mobile navigation drawers, and accessible FAQ accordion components.
- Integrated backend REST APIs for instant loan quote comparisons, newsletter subscriptions, and customer inquiry submissions.

Tech Stack: *React.js, Next.js, TypeScript, GSAP, ScrollTrigger, Tailwind CSS, REST APIs, Formik/Zod*

Money Parking (FundPilot) — *Frontend Developer* moneyparking.in

Smart portfolio tracking and client management SaaS built for Indian mutual fund distributors, tracking client holdings with real-time XIRR calculations and NAV auto-sync.

- Developed responsive distributor and investor portal interfaces in **Next.js, React.js, and TypeScript** with **Tailwind CSS** for portfolio monitoring.
- Built interactive portfolio data tables with client-side searching, multi-column sorting, and pagination to display investor holdings, SIP details, and transaction history.
- Incorporated **GSAP** for smooth dashboard animations, micro-interactions, and animated metric counters showcasing AUM growth and active client counts.
- Integrated REST APIs for automated client onboarding, ARN distributor verification, and real-time portfolio valuation updates.
- Managed complex client-side UI state and cached API data using **Redux Toolkit and TanStack Query**, ensuring fast screen transitions and minimal reload times.

Tech Stack: *React.js, Next.js, TypeScript, GSAP, Tailwind CSS, Redux Toolkit, TanStack Query, REST APIs*
