DEEPANSHU DHINGRA

Frontend Developer | React.js • Next.js • TypeScript • Tailwind CSS • Zustand • REST APIs

1.5+ Years Experience | BCA | Responsive Web Applications, Modern UI & Component Design

PROFESSIONAL SUMMARY

Frontend Developer with **1.5+ years of experience** building responsive, user-friendly web applications using **React.js, Next.js, TypeScript, JavaScript (ES6+), and Tailwind CSS**. Proficient in crafting engaging user interfaces with smooth animations using CSS and GSAP, implementing state management with **Zustand**, and integrating **REST and GraphQL APIs**. Experienced in translating Figma designs into clean, semantic, and accessible code across fintech, hospitality, and SaaS platforms. Dedicated to writing modular, reusable components, improving web performance, and collaborating effectively across cross-functional teams.

CORE SKILLS

- **Frontend & UI Frameworks:** React.js, Next.js (App Router / Pages), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI (MUI), SASS/SCSS, Responsive Web Design
- **Animation & Interactivity:** CSS3 Transitions & Keyframes, GSAP, ScrollTrigger, SVG Animations, UI Micro-interactions
- **State Management & Forms:** Zustand, Context API, Formik, React Hook Form, Zod Schema Validation
- **APIs & Data Integration:** REST APIs (Fetch / Axios), GraphQL, WebSockets, JSON Data Handling
- **Tools & Workflow:** Git, GitHub, Postman, Chrome DevTools, Vercel, Figma (UI Translation)

PROFESSIONAL EXPERIENCE

Frontend Developer

1.5+ Years Total Experience

Developed and maintained modern, responsive frontend web applications across fintech, hospitality, and SaaS domains. Focused on building reusable UI component libraries with React.js, Next.js, and TypeScript, implementing interactive UI features with GSAP and CSS, managing client state with Zustand, and connecting frontend views with backend REST/GraphQL APIs. Collaborated closely with UI/UX designers and backend developers to deliver clean, fast, and cross-browser compatible user experiences.

- Built reusable, accessible UI component hierarchies in **React.js, Next.js, and TypeScript** using **Tailwind CSS** for scalable design systems.
- Structured lightweight client-side state architecture using **Zustand**, eliminating redundant re-renders and improving overall screen responsiveness.
- Integrated backend **REST and GraphQL APIs** with robust client validation, handling real-time WebSocket feeds and error boundary safeguards.
- Collaborated with design teams via Figma to translate complex interactive wireframes into pixel-perfect, mobile-first web applications.

PROJECTS & TECHNICAL ENGAGEMENTS

NuGen Atria — *Frontend Developer*

nugenatria.com

Cloud-based hospitality operating system enabling hotels to manage online bookings, front-desk check-ins, room inventories, and in-stay guest service requests.

- Developed responsive admin dashboard interfaces in **React.js, Next.js, and TypeScript**, allowing hotel staff to manage property profiles, room inventories, and daily bookings.
- Built interactive front-desk check-in and checkout workflows with dynamic room grids, date selection, and clear booking status indicators.
- Integrated real-time **WebSocket feeds** to update front-desk staff on incoming guest reservations, housekeeping room cleaning updates, and dining service requests.
- Designed reusable, accessible form controls and modal workflows using **Tailwind CSS** for managing guest profiles, stay histories, and billing records.
- Implemented responsive navigation and smooth layout transitions to ensure seamless usability across tablet and desktop front-desk terminals.

Tech Stack: *Next.js, React.js, TypeScript, Tailwind CSS, WebSockets, Zustand, REST APIs, HTML5/CSS3*

Money Parking — *Frontend Developer* **moneyparking.in**

Mutual fund distribution and investor platform integrated with NSE for automated client onboarding and live order execution.

- Integrated frontend workflows with **NSE (National Stock Exchange)** APIs for live exchange synchronization, automated client registration, and order feeds.
- Engineered multi-step investor onboarding and profile management suites with accessible stepper navigation, Aadhaar/PAN validation, and OTP authorization.
- Built interactive mutual fund scheme discovery and order placement interfaces featuring multi-word search, fund filtering, and live transaction modals.
- Designed granular order details views with status indicators and printable receipts, improving transaction clarity for distributors and investors.
- Managed client-side application state using **Zustand**, implementing skeleton loaders and non-blocking background sync to eliminate hydration flicker.

Tech Stack: *Next.js, React.js, TypeScript, Tailwind CSS, Zustand, GSAP, REST APIs, NSE Integration*

Arrive Hotels — *Frontend Developer* **arrivehotels.com**

Content-driven luxury hospitality web platform built with Next.js delivering responsive room discovery, multi-step booking funnels, and localized guest experiences.

- Built responsive, mobile-first web pages in **Next.js and React.js**, consuming **GraphQL and REST APIs** to display real-time room availability and seasonal rates.
- Implemented engaging scroll and entry animations using GSAP and CSS for room showcases, amenity cards, and photo galleries.
- Engineered a clean multi-step booking flow featuring interactive date pickers, room selection filters, and guest information forms.
- Optimized page loading times and Core Web Vitals through Next.js static generation, lazy loading, and WebP image optimization.
- Created reusable UI components styled with **Tailwind CSS**, ensuring pixel-perfect alignment with Figma design mockups.

Tech Stack: *Next.js, React.js, TypeScript, Tailwind CSS, GSAP, GraphQL API, Headless CMS (DatoCMS), REST APIs*

CapGro Finex — *Frontend Developer* **capgrofinex.com**

Regulated financial distribution web platform enabling users to compare loan offers (Home, LAP, Business, MSME), mutual funds, and insurance with transparent APR metrics.

- Developed an interactive, slider-driven **EMI calculator** in **React.js and TypeScript**, computing monthly EMIs and rendering dynamic visual breakups for principal vs. interest in real time.
- Implemented fluid page animations, scroll-triggered section reveals, and metric counters using GSAP and ScrollTrigger to enhance user engagement.
- Built multi-step loan comparison and free credit score inquiry forms with OTP verification, masked input fields, and validation using **Formik and Zod**.
- Styled responsive, modern UI components with **Tailwind CSS**, featuring clean typography, mobile navigation drawers, and accessible FAQ accordion components.
- Integrated backend REST APIs for instant loan quote comparisons, newsletter subscriptions, and customer inquiry submissions.

Tech Stack: *React.js, Next.js, TypeScript, Tailwind CSS, GSAP, ScrollTrigger, REST APIs, Formik/Zod*

EDUCATION

Bachelor of Computer Applications (BCA)

Key Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies
